- We can support non-proprietary parts. All commercially available components and heir derivatives (parts that are commercially available with mods and upgrades)

Service Offerings

- Service Contracts
- PM Service contracts
- As needed service
- Fly and Fix
- Process support

Experience

- OEM trained FSEs
- Average 25+ years experience

About us

The IQW Group has been supporting the semiconductor industry with value-added services for over 30 years. We are a manufacturer's representative, distributor, reseller and remarketer for process tools and critical parts. We also support our customers with refurbishing services, repair services, turnkey projects and labor resources. Our expertise in supporting the global semiconductor manufacturing market allows us to be highly flexible to meet our customers' needs.
